Task 6: Display Department to the Assigned To User (Dot Walking)

Task Information

Epic	Dot Walking
Assigned to	Bharathi P (Team Leader)
Team	Skill Wallet - Nan Mudhalvan
Institution	Anna University BIT Campus, Trichy
Project	Automating Data Import and Relationship Mapping Using Import Sets & Dot Walking

Description

Configured the Incident form in ServiceNow using Dot Walking to automatically display related user details (Department, Email, Manager) when an Assigned To user is selected — without needing to open the user record manually.

What is Dot Walking?

> *Dot Walking in ServiceNow allows you to traverse reference field relationships and display fields from related tables directly on a form. For example, 'Assigned to.department' pulls the department of the selected user automatically.*

Step-by-Step Process

1. Navigated to: All > Incident > Create New
2. Right-clicked anywhere on the Incident form header.
3. Selected: Configure > Form Layout
4. In the Form Layout screen, added the following dot-walked fields from the Available column to the Selected column:

Dot-Walked Field	Description
Assigned to.department	Auto-fills the department of the assigned user
Assigned to.email	Auto-fills the email of the assigned user
Assigned to.manager	Auto-fills the manager of the assigned user

5. Clicked Save to apply the form layout changes.

6. Tested the configuration: created a new Incident, selected one of the imported users in the Assigned to field, and verified that Department, Email, and Manager fields auto-populated instantly.

Objective Achieved

- Incident form enhanced with dot-walked fields for seamless relationship visibility.
- Reduces manual lookup — related info displayed directly on the form.
- Improves data accuracy and user experience.
